

The Affective and Biological Underpinnings of Substance Use and Anxiety (ABUSA) Lab (Director: Dr. Teresa Leyro) is looking for a team of eager and dedicated research assistants to work with our lab this summer/fall on projects studying the association between affective-cognitive vulnerability and autonomic imbalance among an adult smoking population. Responsibilities will include recruiting participants from New Brunswick area, completing clinical phone screens, scheduling lab visits, data entry and management, performing literature searches, and other research related tasks. Applicants must be interpersonally skillful, mature, responsible, motivated, and able to use good judgment when dealing with clinical participants, and able to commit at least 10 hours/week to the lab this summer and fall. If you are interested, please send your resume and the application form, attached, to [abusa.rutgers@gmail.com](mailto:abusa.rutgers@gmail.com), by April 12th at 5 PM.
