

New lab is recruiting students:

Dr. Rob Foels:

Current projects include:

- the role of feminist identity and cognitive complexity on the acceptance of myths regarding victims of sexual assault
- manipulating cognitive complexity to reduce intergroup biases
- gender differences in cognitive complexity (women are more complex)
- political ideology and cognitive complexity
- how prejudice and discrimination are presented in textbooks
- how gender dysphoria is presented in textbooks
- the role of cognitive complexity and collective esteem in depression

Future projects with potential Spring 2018 start dates:

- outgroup hatred versus ingroup preference in explaining intergroup biases
- feminist pedagogy

Qualifications for working with Dr. Foels include:

- psychology major
- GPA of 3.3 or greater
- strong library skills
- commitment to 9 hours a week of research activities
