

**The Rutgers Human-Computer Interaction Lab is recruiting research assistants for the spring semester.**

This experience is ideal for people interested in pursuing a career or degree in user experience, social psychology, cognitive psychology, or applying their psychology skills to jobs in industry. The lab is interdisciplinary and its members come from a range of departments including Electrical and Computer Engineering and Psychology.

**The lab requires 4 hours of your time each week** (you get to sign up for the hours that work for you). **The position is volunteer-based**, meaning you will not be paid or receive course credit. However, if it is of interest to you, you can receive Electrical and Computer Engineering credits.

In order to apply, please email the postdoc, Meghan McLean, at [mcm276@scarletmail.rutgers.edu](mailto:mcm276@scarletmail.rutgers.edu) with your current GPA, a sentence about your future academic or career goals, and your resume as soon as possible (positions will be selected on a rolling basis). Please use the email title: **HCI Research Position**.
