Program Description: The program consists of a eight courses, which may include lower- and upper-division lectures, small seminars (including advanced statistics and research methods), hands-on research lab courses, and/or hands-on internship courses. The program can be completed at the student's own pace, in as little as 6 months or in as many as 24 months, depending upon one's schedule and preferences. A faculty advisor will work closely with students to help plan courses and provide guidance on obtaining letters of recommendation, choosing graduate programs, writing personal statements, and applying for jobs.
