

FREE HEARING SCREENING Hosted by Rutgers University Speech and Hearing Club
SUNDAY, MARCH 3, 2019, 1-4 P.M. 1 SPRING STREET NEW BRUNSWICK, NJ 08901
Only 16% physicians routinely screen for hearing loss Listening to music on a smartphone at high volumes over time can cause permanent damage to hearing. SIGN UP FOR A HEARING SCREENING TODAY! An audiologist in collaboration with the RU Speech and Hearing Club will be offering free hearing tests to Rutgers students and faculty

Students can either volunteer to administer hearing screenings under supervision of an audiologist (we have 1 volunteer spot left) and/or receive a hearing screening. Both ways of participating would expose students to audiological methods/procedures (operating hearing technology such as audiometers, recording data, etc).

Students interested in volunteering can [sign up here](#).
