The Rutgers Emotion Health and Behavior Lab is looking for 3 volunteer RAs to begin this fall. If you are interested, please read the descriptions of the roles below and apply through this link: https://rutgers.ca1.qualtrics.com/jfe/form/SV_9NaxjqlMe1jDY1L

1. We are seeking support on an ongoing research project analyzing the fluctuation in hormones and emotions in female smokers over their menstrual cycle. This position involves the following primary roles: participant recruitment and screening, providing participant instructions and weekly feedback on compliance, organization and assembly of study materials, and data entry. The minimum commitment for this position is 2 semesters, 8 hours per week. Priority will be given to upperclassmen and applicants with prior research experience.

2. We are seeking a research assistant to support our new projects in physical activity. The REHAB lab is finalizing our exercise research facility and protocols in order to begin research on psychological, behavioral, and metabolic factors relevant to exercise. These studies will involve running participants through behavioral and self-report assessments as well as recording and interpreting metabolic measurements during exercise. Responsibilities also include participant recruitment and screening, data entry, assembly of study materials, and care of equipment. Priority will be given to upperclassmen and applicants with prior research experience, particularly in the fields of exercise science and health psychology.

3. We are seeking a post-baccalaureate volunteer Research Assistant to provide general support on an intervention study for patients in cardiac rehabilitation. Successful candidates will have strong attention to detail and excellent interpersonal skills. This opportunity is a great fit for individuals with interest in health psychology/behavioral medicine, especially those intending to apply to graduate programs. Priority will be given to candidates with prior research or clinical experience. Must have flexible availability on Mondays, Thursdays, and Fridays and be able to transport self to the Cardio Metabolic Institute in Somerset and the REHAB Lab on the Livingston Campus in Piscataway."
