

RA opportunities: The Affective and Biological Underpinnings of Substance Use and Anxiety (ABUSA) Lab (Director: Dr. Teresa Leyro) is looking for a team of eager and dedicated research assistants to work with our lab for the 2019-2020 Academic Term on a project examining how females with and without depressive symptoms process emotional information. This study has a specific focus on the associations between stress, physiology, emotion, and behavior.

Beginning responsibilities will include recruiting participants from the Rutgers undergraduate subject pool and the New Brunswick area, completing clinical phone screen interviews, scheduling lab visits, data entry and management, and conducting participants through research procedures. Applicants must be interpersonally skillful, mature, responsible, motivated, able to use good judgment when dealing with clinical participants, and able to commit at least 10-15 hours/week to the lab.

If you are interested, please request an application by emailing abusarutgers@gmail.com with the subject line “ABUSA Lab Research Assistant Application”. Thank you!
