Course Description and Objectives

Let’s have fun this semester studying motivation, learning, memory, development, personality, perception, abnormal behavior, psychotherapy, attitude change and group behavior. By the end of this course, you should be able to:

- Demonstrate facility and familiarity with the basic terminology and theories of psychology.
- Demonstrate understanding of scientific methodology as it applies to psychology and related disciplines, and recognize potential pitfalls in evaluating scientific data.
- Differentiate products of pseudo-psychology from products of scientific psychology.
- Apply psychological findings and principles to the understanding of themselves and others.
- State important historical contributions to the field, and identify pertinent research findings that support or refute current theory and principles.
- Demonstrate increased self-understanding and acceptance, show increased tolerance and appreciation of individual and
LEARNING GOALS:

This course has been certified as satisfying the Social Analysis (SCL) Learning Outcome Goal of the SAS Core Curriculum

Core Curriculum Learning Goals Met by this Course

Specifically, students will be able to:

a) Explain and be able to assess the relationship among assumptions, method, evidence, arguments, and theory in social and historical analysis (subgoal i);

and

b) Apply concepts about human and social behavior to particular questions or situations (subgoal n).

For list of Core Curriculum learning goals, see: [http://sas.rutgers.edu/component/docman/doc_download/413-summary-of-new-core-curriculum-learning-goals](http://sas.rutgers.edu/component/docman/doc_download/413-summary-of-new-core-curriculum-learning-goals)

**Instructional Resources**

**Required:**

2) iclicker (or iclicker2 or iclicker+) ISBN: 9781464120152
TEACHING PHILOSOPHY:

My bias is to explore content areas in depth, as opposed to giving superficial coverage to many areas. If time becomes a limiting factor, changes in the schedule will reflect that bias. Thus, topic areas and readings may be dropped or added, depending upon time constraints. I believe education is a cooperative enterprise in which you have an active role. Therefore, I want to encourage an active participation on your part during the course. Please don't hesitate to respond, question, and challenge. To facilitate this process, I will occasionally ask you to take part in experiential exercises or discussion groups. I hope these experiences will allow you to apply the material we cover to your own lives.

CLASS PARTICIPATION

The clicker system will allow for interactive class participation which is difficult in large classes. When a question is presented on the PowerPoint during lecture, you will answer and receive 1 point for each question answered, and 2 points for each question answered correctly. This will be out of 100 points (I will present about 190-200 points worth of questions, therefore I am accounting for missed days). I will give you an extra credit point for every 10 points received above 100 points.

The 2nd and 3rd lectures will count as practice. It is important that you purchase your clicker as soon as possible after the first class session. Starting with the 4th lecture of the semester, responses will count toward your grade. There will be, on average, 5-10 questions per class.

Make sure to address clicker issues within a week after the class in question. It is your responsibility to make sure your clicker points show up on Sakai within a week of each class period. Please do not contact me with clicker concerns more than a week old.

Please register your clicker on the Sakai workspace (tab iclicker), not the iclicker website.

IN THE CLASSROOM:

Do not leave lecture early: Besides distracting your fellow students, when I hear people leaving or packing their bags, I become very distracted. I end up losing my train of thought and will have to stop the lecture until the noise ceases. I understand that occasionally people must miss part of a class. If you intend to do so, please sit close to the door so you won’t distract everyone.

Syllabus & Sakai Site: This contains everything you need to know about the course; keep this in your notebook and refer to it often. I reserve the right to change this syllabus in writing or by announcement.
ATTENDANCE POLICY:

You do not need to present a note unless you experience extended absences.

Legitimate reasons for absence include, but are not limited to, death in the immediate family, religious observance, academic field trips, participation in an approved concert or athletic event, direct participation in university disciplinary hearings, and jury duty.

Nevertheless, the student bears the responsibility for fulfilling all course expectations in a timely and responsible manner. If you miss an exam or are absent for an extended period, please go to the Deans Office http://deanofstudents.rutgers.edu/ and present your evidence of absence.

ACADEMIC INTEGRITY:

http://academicintegrity.rutgers.edu/academic-integrity-policy/Violations include: cheating, fabrication, plagiarism, denying others access to information or material, and facilitating violations of academic integrity.

DIVERSITY POLICY:

The State University of New Jersey, does not discriminate on the basis of race, color, national origin, sex, sexual orientation, gender identity or expression, disability, age, or any other category covered by law in its admission, programs, activities, or employment matters. The Department of Psychology at Rutgers, New Brunswick is committed to promoting tolerance and respect for differences in the classroom and across campus. Students enrolled in this course are expected and required to treat all students with respect both inside and outside of the classroom.

ADDITIONAL CREDIT

For every 10 clicker points above 100, you will be given an extra credit point. You may only complete 2 extra credit assignments listed below.
Option 1: Engage in a class debate (5 points) I have included 4 debate issues on Sakai along with time slots under the “sign up” tab.

1) Read the issue and decide if you would like to participate in the “yes” or “no” arguments.
2) Sign up for a time slot under the debate in which you wish to engage. There is a maximum of 3 people for each time slot.
3) Read the essay and prepare for a debate on stage with students presenting the other side of the issue.
4) You do not need to submit your arguments, but they should be well-thought out and logical.
5) You can only participate in one debate

Option 2: Article Summaries (4 points) - make sure to include information from the course (use the book as the reference) to expand on the concepts presented in the articles. YOU MUST REFERENCE COURSE MATERIAL.

1) Find 2 articles relating to one of the topics we are studying in the popular press (Psychology Today, Scientific American Mind, New York Times, Time magazine, etc. - I will be posting interesting articles on the FB site)
2) Summarize (about 1.5 pages each) the article and **be sure to include how it relates to the topic covered in class.**
3) Make sure that you include in-text references along with a reference page in proper APA style.
4) The articles do not have to be related to each other.
**Due 4/27 by 11:50pm**

Option 3: Shoot a video to illustrate some psychological concept.

The video should be at least 2 minutes long and you should submit a written explanation of the concept and how it was illustrated.

Animals and children often make good subjects for videos. Many aspects of a child's cognitive or moral development that could be demonstrated with a video such as object permanence, self-control, conservation, the ability to see things from another's perspective, the application of logical principles, how they think things work, and the reasons why they believe certain behaviors are either right or wrong.
**Due 4/27 by 11:50pm**
Students in General Psychology are **REQUIRED** to earn 7 research participation units (RPUs). However if you choose not to participate in research, you have the option of writing 2 papers describing psychological research.

Please read the description and requirements on the research homepage: https://psych.rutgers.edu/academics/undergraduate/general-psych-requirement

To sign up as a subject for experiments, to cancel an appointment you have already made, to find out how many Research Participation Units you've earned so far, or to contact a researcher for any reason, go to https://rutgers-researchpool.sona-systems.com/Default.aspx?ReturnUrl=%2f

If you choose to write the 2 papers instead of participating in experiments, you must submit the first paper by 3/9 (see course schedule) and the second paper by 5/4.

See the Human Research Student Requirements web page (scroll down to the Option 2 section) for the specific requirements for the papers (including how you must format your papers, what journals are acceptable as sources for your articles, etc.).

For more information, see the Sakai site.

Inevitably every semester there are students who are not happy with their grades and seem to not be concerned until the day before the final. Please do not put yourself in that position and make sure that you keep up with the class throughout the semester. The following are some tips on how you should study for the exams:

If you want to learn the subject matter well, read the assigned material before the lecture, review the power points after the lecture, quickly go over it again a day or two later, and then re-read the notes and the chapter for a few days before the exam. Memory researchers have established that you will understand and remember something better by studying it several times spread out over days than by studying the same amount of time all at once. Also, of course, the more total time you spend studying, the better.

When you study, don’t just read the text and lecture notes but stop and think about the material. The more actively you use the material, the better you will remember it. Also test yourself! There will be practice questions posted for each in-class exam.

I created a Facebook group for this class called General Psychology at Rutgers
http://www.facebook.com/groups/149219315217433/ Please to join this group and I will add you. I will be posting articles and psychology related issues to enhance your knowledge of the area.

If you have a private concern, please email me or the TA. In your email, please include your full name (as it appears on the roster), your class and section. I will try my best to return your email within 48 hours, however feel free to email an undergraduate TA.

HOW TO DO WELL IN THIS CLASS:

- Attend class and answer the clicker questions.
- Complete every quiz on time.
- Read the assigned material carefully and closely, taking notes in your own words. Stop after each paragraph or two and make sure you understand the important points. You should end up with many pages of notes for each chapter, which are now your study materials. Outline the chapters in your own words with information from the book and lecture.
- Access the materials on Sakai
- At least a week before the exam, begin studying your notes on the readings and your notes from class. Get more information about concepts you do not understand by contacting me or working with your undergraduate TA.
- Work actively with the course material: develop your own examples of concepts; explain in your own words how certain topics in psychology are studied; draw models of the concepts; organize the material in each chapter in ways that make sense for you; compare your class notes to the textbook; etc.
- Contact me or your undergraduate TA to ask questions or just to talk about the material. I would be happy to look at your notes and study materials to see if I have any advice for you.
- Work productively during class. During class we will actively analyze, apply, and evaluate the text material.
