Office hours: By arrangement, Psychology Building

Course Description:
Sensation & Perception is the area of psychology that studies how humans and other animals convert information from the outside world into information that brains can use and convert it into information we (or the animal) can use to navigate the outside world. As such, it is central to almost all aspects of behavior and cognition. In this class, we will be examining this process from a broader, information-theoretic based angle to gain a greater understanding of these underlying processes.

Learning Goals
1. Understand how sensory organs interact with the nervous system to create a picture of the world
2. Learn how psychophysical and biological methods are used to scientifically measure perception
3. Identify how connections are made between the brain and the environment

Course Readings:
Previous versions may be acceptable, but you are responsible for all the information in the 5th edition. Assigned chapters are posted for the 5th edition and it is your responsibility to ensure you are reading the proper chapters if using an older edition.

Grading Policy:
Attendance/Participation: 10%
Midterm: 35%
Final Exam: 35%
Presentation: 20%
Total: = 100% maximum

Gradescale:
90%-100% A
85%-89.9% B+
80%-84.9% B
75%-79.9% C+
Course Policy & Requirements:

1) Attendance and Participation: 10%
   a. Attending lectures is your most important resource for succeeding in this course. There will be in class discussions, demonstrations, and topics covered that may not be adequately explained or mentioned in the text that you will be responsible for knowing for the exams.
   b. Missed classes: you are responsible for any and all material covered in class. *Every unexcused absence will result in 1 point off your final grade.* Undue latenesses and insufficient participation will also reflect poorly on your overall grade.
   c. Computers are allowed in class for note taking, but cell phone use is not. Excessive cell phone use will reflect poorly on your participation grade.
   d. Assigned readings for each class will be posted – it is expected that you are all familiar with the course material assigned for the day and you will come to class prepared with any questions you may have.

2) Exams: 2 total (both worth 35%) 70%
   a. Unexcused absences on exam days will result in a ‘0’ grade for that exam and no makeup will be given. Any rescheduled or makeup exams must be scheduled *prior* to exam day.
      i. A makeup exam will only be given in the case of a documented illness--such absences will require a doctor’s AND dean’s note in order to qualify for a makeup exam.

3) Presentation: (20%)
   a. a 20 minute group presentation about a topic (more information to follow)

4) Any information regarding changes in class times, locations, etc will always be sent out via sakai announcements

*Academic Integrity:*
Students must comply with the Rutgers Academic Integrity Policy: [http://academicintegrity.rutgers.edu/](http://academicintegrity.rutgers.edu/). Do not cheat during exams-it is not worth the risk. If you are struggling in the course I am happy to help.
## Course Schedule:

<table>
<thead>
<tr>
<th>Week#</th>
<th>Date</th>
<th>Objective, Readings, Assignment</th>
</tr>
</thead>
</table>
| Week 1Tue | Tue, Jul 9 | *Reading: Ch1, Ch 2*  
Course Obj: Intro to S&P, Psychophysics and biology of perception, Light physics, information processing |
| Week 1Thr | Thr, Jul 11 | Reading: Ch3, 4  
Course Obj: Spatial vision, light optics, the striate cortex, perceiving and recognizing objects |
| Week 2Tue | Tue, Jul 16 | Reading: Ch5, 6  
Course Obj: Color perception, space perception and binocular vision, depth perception |
| Week 2Thr | Thr, Jul 18 | Reading: Ch7, 8  
Course Obj: visual attention and scene perception, disorders of attention, motion perception, eye movements |
| Week 3Tue | Tue, Jul 23 | Midterm! 35% (ch1-8) |
| Week 3Thr | Thr, Jul 25 | Reading: Ch9, Ch10  
Course Obj: hearing physiology, psychoacoustics, structure of auditory system, sound localization |
| Week 4Tue | Tue, Jul 30 | Reading: Ch12, 13  
Course Obj: vestibular sensation, spatial orientation perception, touch physiology, haptic perception |
| Week 4Thr | Thr, Aug 1 | Reading: Ch14  
Course Obj: olfaction physiology, neurophysiology of olfaction, olfactory psychophysics |
| Week 5Tue | Tue, Aug 6 | Reading: Ch15  
Course Obj: anatomy and physiology of gustatory system, taste vs. flavor, taste contribution to regulation of nutrients |
| Week 5Thr | Thr, Aug 8 | Presentation! 20%, |
| Week 6Tue | Tue, Aug 13 | Final Exam! 35% (ch 9, 10, 12-15) |

***Syllabus and course schedule subject to change***
