

Infant & Child Development Lab Spring 2019
Wednesday 12:00pm – 3:00pm
Tillett 205

Instructor: Vanessa Hatton
Email: v.hatton@rutgers.edu

Office Hours: Please see me (by appointment only)

RESEARCH LOCATION

Rutgers Psychology Child Development Center (Cook)
Three course days will be spent collecting data at the Rutgers Psychology Child Development Center, located at 61 Dudley Road, New Brunswick. Please refer to the syllabus for the experiment dates. Students are responsible for their own transportation and timely arrival.

Course Objectives

This course has been certified as satisfying four of the Writing and Communication Learning Outcome Goals of the SAS Core Curriculum. Specifically, students will be able to:

- Respond effectively to editorial feedback from peers, instructors, and/or supervisors through successive drafts and revision;
- Communicate effectively in modes appropriate to a discipline or area of inquiry;
- Evaluate and critically assess sources and use the conventions of attribution and citation correctly;
- Analyze and synthesize information and ideas from multiple sources to generate new insights.

The aim of this course is to acquaint students with scientific research in the field of developmental psychology. In particular, we will focus on:

- Methods and techniques related to research design
- Procedures of collecting and coding data
- Using statistics and statistical software to analyze data
- Interpreting the results of the analyses
- Professional writing of empirical papers in the field of Psychology

Structure of the course

Throughout the course, students should adopt a scientist's approach to research experiences. The course is designed around three primary units and three corresponding hands-on studies in child development to be

conducted at the New Jersey Institute for Food, Nutrition, and Health (IFNH) located in Douglass Campus. Therefore, this course requires 3 visits to the IFNH during the session/semester. Students are responsible for their own transportation to the IFNH and timely attendance is crucial!

The course content progresses from simpler to more complex research designs and statistical analyses. Mirroring the progressive structure of the course content, the assignments slowly build American Psychological Association (APA) report-writing skills and give the student increasing autonomy to use these skills in their writing.

You will have to write components of research reports throughout the course, culminating in a final research paper. Most of your assignments will be done in the lab. Please use this time to learn from each other and to ask for my help too. For the first unit and second unit you will work with partners. For the third, you will work alone and you will be asked to apply what you learned so far in the course to demonstrate you know how to write a scientific APA style report.

Course Website

If you are properly registered for the course, you have access to the course website through Sakai. There you will find copies of lectures, assignment instructions, and other related materials.

You are responsible for all the information contained in this syllabus and for all changes to the syllabus that I announce in class or post on Sakai. It is important to note that the syllabus is subject to change, so please consistently check the syllabus on Sakai so that you are aware of these changes. The schedule of class topics and/or assignments is subject to change as necessary. Changes will be made known via emails, Sakai announcements, and/or lectures slides. You are responsible to check these resources.

Required Readings

There is no required textbook for this course; however, I encourage you to obtain a copy of the APA style guide: Publication Manual of the American Psychological Association (6th Edition). APA. ISBN-13: 978-1433805615.

Additional readings posted on the schedule will be available on the course site. All readings should be completed prior to the assigned class day. You should come to class prepared to discuss the readings.

Assignments

You will write the 4 main contributing sections of an APA style research report (introduction, methods, results, discussion) during this course. At the end of the final unit, you will be asked to submit a complete APA style research report that demonstrates your ability to incorporate everything that you have learned throughout the semester. You will be given ample in-class time to work on assignments, but also expect there to be out-of-class work, especially toward the end of the semester.

- All written assignments are submitted through Sakai. Please clearly title your file with your first and last initials and upload as a .doc or .docx. (e.g., PI_Method_MC&JH.doc)

- All submitted assignments should be written in Times New Roman 12 point font and double spaced.
- Evaluation of your work is based on the content as well as the APA format. When preparing the assignments, please review the appropriate standards and check your work to make sure it complies. The standards should be a constant point of reference for you to determine whether you are on track to acquiring and using the psychology writing skills that are a crucial part of this course.

A penalty of one point per day late is assessed for overdue assignments unless special arrangements are made in advance. Assignments past 3 days of the due date will NOT be accepted.

- Academic integrity: By participating in this course you will be accepting the principles defining academic integrity. Please familiarize yourselves with Rutgers' Policy on Academic Integrity: <http://teachx.rutgers.edu/integrity/policy.html>

Attendance & Participation

Attendance is required at all lab meetings. If there is a date you know you absolutely will not be able to attend, please notify me well in advance (at least two weeks beforehand, if not earlier), so that proper arrangements can be made and be sure to contact another student to catch up on what you missed. Unless otherwise noted, absences will require that you provide written documentation from the Dean's office.

- As the class is designed to give you experience with methodology in the field, your presence at all lab meetings is mandatory. In all cases, an absence must be justified with written documentation from the Dean's office.
- One unexcused absence will deduct 2 points on participation scores.
- Missing two or more unexcused classes will result in an automatic "F" for the course.
- Please be on time. If you arrive more than 20 minutes after class has begun, this will be counted as an unexcused absence.
- Please keep in mind that most coursework is closely related. If you miss lab the week before the preschool visit, you will not know what to do with the children at the preschool. If you miss the day at the preschool, you will not have any contribution to our data collection and analysis, and if you miss lab the week after the preschool, you will not know how to write the results.
- No make-up classes. If there is a date you know you absolutely will not be able to attend, please notify me in advance (at least two weeks beforehand, if not earlier), so that proper arrangements can be made and be sure to contact another student to catch up on what you missed. An excused absence does not excuse you from the assigned work. You will have to make up the assignments if you are absent from class. Missed assignments will be given a "0".
- Active participation in the lab is *highly* encouraged. Student participation can add greatly to your learning and enhance the experience for the whole class. It will be consistently noted and factored into your final grade.
- Listening to the lecture attentively is everyone's responsibility! It will also be consistently noted and factored into your participation grades.

Grading Policy

Evaluation of your work will be based on such factors as the quality and content, writing style, degree of thought and effort reflected, and adherence to APA format. Grades will not be "curved"—in other words, everyone in the class could get an A, or everyone could get a C. Your success in the class does not affect anyone else's and vice versa. You will get the grade that you and you alone, earn in this course.

-
- Evaluation of your work will be based on such factors as the quality and content, writing style, degree of thought and effort reflected, and adherence to APA format.
- **Late assignments will be assessed a penalty of one point per day** (e.g., a paper which would have been graded as a “10” will be reduced to an “8” if submitted 2 days late) unless special arrangements are made *in advance*.
- **Your final grade will be comprised of three components :**
 - **Writing assignments (may change) 60 points**
 - **Final, Full Lab Report (1) 40 points**
 - **Attendance/Active Participation 28 points**

Grading Scale

At the time the syllabus was created, a total of 128 points may be earned. Your total number of scored points (which are subject to change) will yield your final grade. The numerical grade translates to the letter grade as follows:

A	= 90% or above	B+	= 85-89%
B	= 80-84%		
C+	= 75-79%		
C	= 70-74%		
D	= 60-69%		
F	= 59% or below		

Final grades are based on the total number of points earned in accordance with the grading scale below, no exceptions. There is absolutely no end-of-semester negotiation period where students can plea and barter for a better grade in the class. If you are dissatisfied with your performance in the class, discuss the situation with the professor early— don’t wait until it’s too late to bring up your grade.

Plagiarism

Since what counts as plagiarism is not always clear, I have provided the definition given in Rutgers' policy: Plagiarism is the use of another person’s words, ideas, or results without giving that person appropriate credit. To avoid plagiarism, every direct quotation must be identified by quotation marks or appropriate indentation and both direct quotation and paraphrasing must be cited properly according to the accepted format for the particular discipline or as required by the instructor in a course. Some common examples of plagiarism are:

- Copying word for word (i.e. quoting directly) from an oral, printed, or electronic source without proper attribution.
- Paraphrasing without proper attribution, i.e., presenting in one’s own words another person’s written words or ideas as if they were one’s own.
- Submitting a purchased or downloaded term paper or other materials to satisfy a course requirement.
- Incorporating into one’s work graphs, drawings, photographs, diagrams, tables, spreadsheets, computer programs, or other non-textual material from other sources without proper attribution.

Additionally, I require that your assignments be turned in as electronic copies and we will use Turnitin on Sakai which will check for plagiarism by matching content to information on the web. Any student who plagiarizes will, at the very least, receive a failing grade for the course. More severe consequences (e.g.,

expulsion) are also possible.

 - Free and confidential peer counseling and referral hotline, providing a comforting and supportive safe space.

COURSE SCHEDULE | SUBJECT TO CHANGE

1/30/19- Course Introduction, Overview of the Scientific Method

- Overview of the Course Syllabus
- Review of APA Style and format
- In-class APA Style Activity

Unit 1: Peer Interactions

2/6/19- Introduction to Peer Interactions Unit

- Correlational Studies: Infant-Mother Interactions and Peer Interactions
- Preparation for IFNH Observations
- In-Class Writing Assignment (10 points total)
 - Hypotheses (2 points)
 - Introduction Section (4 points)
 - Methods Section (4 points)

2/13/19- Data collection at IFNH

2/20/19- Peer Interactions Unit Wrap Up

- APA Style Overview:
 - Results
 - Discussion
- In-Class Writing Assignment (10 points total)
 - Results Section (5 points)
 - Discussion Section (5 points)

Unit 2: Theory of Mind

2/27/19- Introduction to Theory of Mind Unit

- Theory of Mind
- How to Use PsychINFO
- Introduction to t-tests and SPSS
- Preparation for IFNH Theory of Mind Experiment
- In-Class Writing Assignment (10 points total)
 - Hypotheses (2 points)
 - Introduction Section (4 points)
 - Methods Section (4 points)

3/6/19- Data collection at IFNH

3/13/19- Theory of Mind Unit Wrap Up

- Data Analysis: T-tests in SPSS
- In-Class Writing Assignment (10 points total)
 - Results Section (5 points)
 - Discussion Section (5 points)

3/16/19- 3/24/19 Spring Break! No lab meeting!

Unit 3: Executive Function

3/27/19- Introduction to Executive Function

- Executive Function
- Preparation for IFNH Executive Function Experiment
- Review of Statistical Tests and when they're used
- In-Class Writing Assignment (10 points total)
 - Hypotheses (2 points)
 - Introduction Section (4 points)
 - Methods Section (4 points)

4/3/19- Data collection at IFNH

4/10/19- Executive Function Unit Wrap Up

- In-Class Writing Assignment (10 points total)
 - Results Section (5 points)
 - Discussion Section (5 points)

4/17/19- Revisiting APA Style for Final Report

- Overview of APA Style
- Overview of Statistical tests and how to write results
- Reviewing guidelines for final report

Assignment: Finish final report, due May 1, 2019 (last day of classes) (40 points total)
