I. Course Description:
Welcome to Introduction to Clinical and School Psychology. This course is intended for undergraduates who are considering careers in applied areas of psychology, specifically focusing on clinical and school psychology. It will provide an overview of professional roles in both specialty areas as well as current topics in educational settings and clinical practice.

Topics include a survey of the professional practice of clinical and school psychology, including the history of each field, theoretical foundations, roles and functions, including assessment and intervention, research base, ethics, work with diverse populations and admission to graduate school. Each overarching topic will be examined from the perspective of both clinical and school psychology. Students will be exposed to different models of professional practice and career paths in schools and clinical mental health settings.

II. Prerequisites: A minimum of an introductory course in Psychology (PSY 101)

III. Goals & Objectives
- Become acquainted with the history, ethics, research base, current issues, and professional roles in clinical and school psychology.
- Develop an understanding of types and methods of clinical assessment utilized with children and adults in school and mental health/clinical settings
- Be introduced to examples of evidence-based interventions with a special emphasis on the link between theory and intervention, including ethical practice.
- Increase awareness of the impact of differences in gender, culture, class, race and sexual orientation on effective psychological intervention.
- Understand the nature of professional training for careers as practicing clinical and school psychologists.
IV. Tips for Success in the Class:
- Students who attend all or most class meetings generally do best. Classes cover material from the readings, power points, guest lecturers, and group discussion and activities, all of which might be asked about on the midterm and final.
- Completing assigned readings before each class will help you to better understand the course content and get more out of class.
- Class participation is important, both in class and on the online message boards. Since our class is large, a main method of participating will be through the use of the classroom response system of iClicker. You will need to purchase a clicker at the bookstore and register it online on our Sakai site. Clicker points and postings are both ways in which your grade is in your own hands, because a sizable number of points can be earned simply by your participation.
- You will need to complete the readings, take notes in class and study thoroughly to do well on exams. Study guides will be posted on the website to help you prepare.
- Professional class behavior and academic integrity are expected.

V. Required Readings:
As a wide range of topics are covered, no one text will be used. Required articles and book chapters will be available on the course website.

VI. Course Website
Go to Sakai.rutgers.edu, log in using your netID and password, then click on the class website. We will be making extensive use of this website. Your readings and assignments will be posted here, as well as the most-up-to-date syllabus. Please check the website frequently for any announcements and updates. Additionally, an important part of your participation in this course will be posting comments and responding to the comments of others.

VII. Grading:
Grades will be based on class attendance and participation, participation in online discussion boards, two multiple choice exams and a project, chosen from a list of choices. The breakdown will be as follows:

<table>
<thead>
<tr>
<th>Attendance/Participation</th>
<th>1.5 points/class attended up to total of: 30 points</th>
</tr>
</thead>
<tbody>
<tr>
<td>Online Participation</td>
<td>2 points per week for required posts</td>
</tr>
<tr>
<td></td>
<td>(not including first and exam weeks)</td>
</tr>
<tr>
<td>Mid-Term Exam</td>
<td>In-class multiple choice</td>
</tr>
<tr>
<td>Final Exam</td>
<td>Cumulative multiple choice</td>
</tr>
<tr>
<td>Project</td>
<td>Assignment chosen from options</td>
</tr>
<tr>
<td></td>
<td>43 points</td>
</tr>
<tr>
<td></td>
<td>60 points</td>
</tr>
<tr>
<td></td>
<td>43 points</td>
</tr>
<tr>
<td>Total Available Points:</td>
<td>200 points</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Number of Points</th>
<th>Grade</th>
</tr>
</thead>
<tbody>
<tr>
<td>180 – 200</td>
<td>A</td>
</tr>
<tr>
<td>170 – 179.99</td>
<td>B+</td>
</tr>
<tr>
<td>160 – 169.99</td>
<td>B</td>
</tr>
<tr>
<td>150 – 159.99</td>
<td>C+</td>
</tr>
<tr>
<td>140 – 149.99</td>
<td>C</td>
</tr>
<tr>
<td>120 – 139.99</td>
<td>D</td>
</tr>
<tr>
<td>Below 120</td>
<td>F</td>
</tr>
</tbody>
</table>
**On Line Posting/Participation:** Because this is a large class, we are using on-line posting as a way of promoting some engagement in the ideas of the class where we get to hear from you and you get to hear from one another about what you are thinking and experiencing. There will be several ways of meeting this objective, all located in the “Forum” section on Sakai. There will be a Question of the Week alternating between clinical and school psychology topics located in Sakai. Some weeks will also give the alternative of engaging in a brief task or experience and writing your reflections on this. You will be required to complete one post a week, and are encouraged to have at least some of your posts respond to a fellow classmate. There will be no posts the last week of class. Overall, you will be expected to post a total of 12 times, with each post worth two points. Questions will be posted on Monday mornings, usually related to the readings/lectures/activities for that coming week, and posts for that week should be in by Sunday. Posts will be counted at Midterm, when you should have your first 6 posts completed, then again at the end of the term, when you should have your next 6 completed. Only posts completed by the time of the final exam will count for the final grade.

**Project:** There will be a number of different course project options. This is the part of the course that we hope will let you tailor it to your own interests and goals. You may choose among a range of choices in both Clinical and School. Go to the Resources section and explore the choices, each in their own folder beginning with “Course Project Option.” You only need to choose one project. These will be due on Tuesday, April 10th, so we’ll have time to grade them before the end of term. A rubric used for grading projects is available in most of the project folders, and you should check your paper against the rubric’s requirements to earn maximum points.

**Extra Credit:** You may earn up to 10 points of extra credit, or up to an equivalent of 5% added to your grade. You may do this by completing an extra credit project, which involves doing a brief role play of a clinical interview and reflecting on your experience. This will be due on Tuesday, March 20th. Extra credit is not required to get an A, but is a way of boosting your grade.

**VIII. Additional course policies:**

- **Attendance & missed classes:** Attendance is essential. This is a class where your presence and participation is a significant part of your grade. Class activities, discussions, demonstrations and videos can’t be replicated outside of class.

- **Exams:** Exams for the course use Scantron answer sheets. Please bring #2 pencils with erasers to both exams.

- **Missed Exams:** Only in cases of serious illness, injury, death or illness of family member or other serious events will a make-up exam be possible. Please notify one of the TA’s at least 24 hours before the exam, or in case of emergencies, within 24 hours, to make arrangements. Exams must be made up within one week of the missed exam. We do offer a one-time early final, given on the last day of regular classes for those who have exam conflicts, three exams in a 24-hour period or other reasons approved by the instructors.

- **Academic Accommodations:** Students requiring accommodations should notify the course instructors of same and provide the necessary documentation supporting the need for accommodations. Advance arrangements for the midterm and final should be made through The Center for Teaching Excellence.
• **Academic Integrity**: University policies on cheating and plagiarism will be adhered to. The University’s academic integrity policy can be reviewed at [http://ctaar.rutgers.edu/integrity/policy.html](http://ctaar.rutgers.edu/integrity/policy.html)

• **Professionalism and Courteous Classroom Behavior**: Professional practice as clinical and school psychologists requires a high degree of self-awareness and sensitivity to others. Because this class is an introduction to these roles, class behavior is expected to resemble the types of behavior required in professional settings. Therefore, it is expected that everyone will do their part to create a focused and engaging learning environment. To that end, cell phone use, texting, side conversations and other behaviors that distract yourself and others will result in loss of attendance/participation points for the day. Cell phones should be turned off and put away at all times.

• **Lateness**: Lateness is inconsistent with professional behavior as practicing clinical and school psychologists; therefore, you are expected to arrive to class on time and remain for the duration of class. This will also enhance the interactive nature of class participation.

• **Clicker Use and Academic Integrity**: Clickers are required for this class and will be used to enhance class participation and the interactive nature of learning experiences. A total of 30 points can be earned spread across 26 classes (1.5 points per class, not including classes during drop/add and the mid-term exam class). This makes allowances for a couple of absences, late arrivals or forgotten clickers. It is expected that each student will use only their own clicker, which you will need to register. Inappropriate use of clickers, such as using multiple clickers on behalf of other students to enter responses, or using another student's clicker, constitutes a violation of academic integrity and will be treated accordingly. Such use is considered cheating.

• **Clicker Points**: If you are having technical problems with your clicker, please speak with the professors/TA’s before or after class. You earn clicker points by your participation in whatever clicker activities are part of that night’s class. Please be aware that clickers are used throughout each class, so coming late or leaving early could impact your points registering for the night. Students are responsible for checking their clicker points on a weekly basis and promptly contacting the TA’s if there are problems or inaccuracies. We have found that it is easiest to correct any scoring problems when they are detected within 48 hours after class. 

![These are the clickers to purchase.](image)

How to Register Your iClicker
- You can register your clicker directly on Sakai.
- Go to the “My Workspace” tab on Sakai and click on the iClicker tab.
- Enter your serial number. There is a picture illustrating where to find it.
- Click “register” after entering the number. It will register you for all your classes.

**X. Readings and Assignments by Week:**

**Week 1**

**Introduction to School Psychology**

**Roles and Functions of School Psychologists**

**Week 2**

**Roles and Functions of Clinical Psychologists**

Many students in the class are considering graduate school in psychology or psychology-related professions. This is a good and comprehensive article that you may find answers a lot of your questions.

**Foundations of School Psychology**

NASP. (2014). Who are school psychologists?

**Week 3**

**Assessment: Basic Counseling Skills**

- Bring to class from Sakai Resources: Basic Helping Model and Summary of Basic Attending Skills

**Assessment: School Psychologists in Special Ed, IDEIA, Section 504**

**Week 4**

**Assessment: The Clinical Interview – Adult**

**Assessment: Referral Process and Data-based problem solving.**

**Week 5**

**Assessment: Psychopathology and the DSM**

**Assessment: Psychological Testing**

Week 6

Assessment: Psychopathology and the DSM
February 19, 2018

Watch the Video of Dr. Terry Wilson discussing his work on the Eating Disorders Workgroup for DSM-5, available on our Sakai site by clicking the “Streaming Video Browser” tab. A summary of the major points of this video is also available in the Clinical Readings in the Resource Section.

Assessment: Clinical Interview-Child, Attachment
February 21, 2018

Week 7

Assessment: Attachment in Adults
February 26, 2018

(Document goes to page 58 and is highly recommended for those of you with an interest in the topic, but only 9-24 is required.)

Professional Ethics in Working with Children
February 28, 2018

Week 8

Professional Ethics
March 5, 2018

MIDTERM EXAM: March 7, 2018

Week 9

Multicultural Issues in Clinical Psychology
March 19, 2018

Multicultural Issues in School Psychology  
March 21, 2018

Week 10

Models of Intervention: Psychodynamic  
March 26, 2018

Shedler, J. (2006). That was then, this is now: Psychoanalytic psychotherapy for the rest of us. An abridgement of this article will be available on Sakai; the full article is at: http://www.psychsystems.net/Publications/Shedler/Shedler%20(2006)%20That%20was%20then%20this%20is%20now%20R7.pdf

Models of Intervention: School Counseling  
March 28, 2018

Week 11

Models of Intervention: Cognitive Behavioral  
April 2, 2018

British Association for Behavioural and Cognitive Psychotherapies (2005). What is CBT? (Downloaded from their website at: http://www.babcp.com/Public/What-is-CBT.aspx)

Models of Intervention and Prevention  
April 4, 2018

NASP: Continuum of Mental Health Services

Week 12

Current Developments in Intervention: Self-Regulation and Neurobiology  
April 9, 2018

Models of Intervention: MTSS, School Connectedness, SEL        April 11, 2018

Week 13

Current Issues in Clinical Psychology: Evidence Based Practice        April 16, 2018

Current Issues in School Psychology: School Violence, Bullying, and Crisis Preparedness and Response

Week 14

Psychological Intervention: Trauma and Trauma Treatment        April 23, 2018

Felitti, M. D., et al. (1998). Relationship of childhood abuse and household dysfunction to many of the leading causes of death in adults: The Adverse Childhood Experiences (ACE) Study. American Journal of Preventive Medicine, 14(4), 245-258. This is an often cited study which brought attention to the lifelong health consequences of childhood trauma, usually referred to as the “ACE Study.” It’s fine just to skim this for the main point of its linking cumulative, severe stresses of childhood to later health outcomes.

Current Issues in School Psychology: TBD        April 25, 2018

Week 15

Review for Final OR

Early Final        April 30, 2018
